This app constantly lags and suddenly disconnects. The desktop portion freezes up with a spinning beach ball and can't be force quit. Se desinstalar tem que comprar novamente O aplicativo é ótimo, comprei e instalei no ipad, entao fui instalar no iphone com a mesma conta e tive que comprar o app novamente Suspicious server on Mac Easy install, working as advertised and then: "Mobile Mouse Server wants access to control System Events." Why? Not so free The app for your device is free, but you have to pay to use your iPhone as the mouse, and then pay again if you want to connect via usb. So the problem is that if your computer isn't already connected to internet, the iPhone app doesn't work, and you can't connect to the internet without the iPhone app. \$4.98 later... Server won't download from site This app is awesome and I used it years ago on a desktop I had. I've been computerless for a few years and got a new laptop. On the site if you click to download the server for windows 7-10 nothing happens. I've made sure downloads are enabled for the site and everything. Really wish I could use this app because it is a great app.
